PROJECTS

CTP - Inline Scheduler (May, 2023)   GitHub | View Project
- Designed and completed the landing page and home (navigation) page as part of the CUNY Tech Prep program. Developed a calendar app in a group project that allows users to create events and schedule daily activities. Upgraded the app individually by adding sign-up page fields, implementing the "Add Friends" feature, and incorporating Firebase for notifications.
- Skills: React, Bootstrap, Tailwind CSS, Firebase.

Meals (January 2023)   GitHub | View Project
- Implemented a food ordering web page. Developed core features including the ability to browse and add items, and view and update a cart.
- Utilized: React, and React hooks(such as useRef, useContext, and useState)

RELEVANT EXPERIENCE

CUNY Tech Prep Fellow - CUNY Tech Prep - Web Development| NY, US   Jul. 2022 – Jun. 2023
- Selected for a competitive web development fellowship with students from across the 11 CUNY senior colleges where Fellows create technical projects using tools such as React, Node + Express, and PostgreSQL.
- Participate in weekly courses and learn industry best practices for design, implementation, and deployment such as MVC, version control with Git/GitHub, agile & Scrum with Trello and Slack, test-driven development, and CI/CD.

Research Foundation of CUNY - Software Engineer Intern | NY, US   Jul. 2022 – Aug. 2022
- Partnered with **Crown Doctors** and **Digital Factory Inc** to develop a database using AWS, working as a team to host and maintain the company application/website through s3, Cloudfront, route 53, RDS, etc.
- Collaborated partner with other team members, and other internal partners through Slack as a communication tool, and through at least two meetings throughout the week to develop and share ideas about the UX/UI, website, and applications.
